

GET

GROUND ENGAGING TOOL SOLUTIONS

Maximising product performance for individual customer requirements

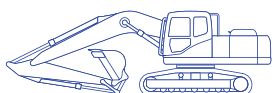

Ground Engaging Tools (GET) represent one of the highest ongoing expenditure items on earthmoving equipment. The performance, productivity and efficiency of loading and excavating machines are all directly affected by the bucket and its components. The wide range of bucket designs and configurations in the industry is testament to the fact that there are numerous ways of tackling the goal of “optimal bucket configuration”.

Komatsu offers both K VX and Hensley GET solutions, which provides an extensive range of GET components. By offering two ranges, we are able to provide our customers with a “true choice” of GET options.

Komatsu’s GET solutions suit an array of applications. From the smallest utility machines to the world’s large production machines, we have a

solution to suit your application and budget, for all makes of earthmoving machinery.

The correct selection of GET components is critical. That is why Komatsu GET gives you “True Choice”.

MAKING THE RIGHT SELECTION

A critical factor in achieving the full productivity of your machine.

PRODUCT DETAILS

Understanding the difference, to make the right choice

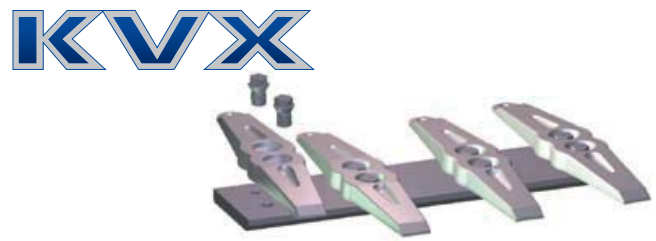

The best adapter system in the world!

Komatsu's Hensley XS adapter system offers the latest technological advancements in cast GET engineering featuring a revolutionary quickchange retention system, with simple, fast tooth changeover.

Key XS Features:

- Fast & simple tooth changeover
- Lower cost re-useable retainers
- Conventional light-weight tooling required
- Safe & reliable hammerless retention systems
- High strength quality castings
- Robust adapter nose design
- Excellent penetration & increased productivity
- Increased productivity with low throw-away mass
- Low mass individual components increases payload
- Low initial investment provides excellent GET economics

A unique bolt-on adapterless system!

The Komatsu K VX system takes a different approach, combining the benefits of premium quality forged steel and the reliability of bolting. The K VX design philosophy overcomes many of the problems associated with conventional GET systems.

Key K VX Features:

- Unrivalled GET retention
- Safe & reliable hammerless retention systems
- 500-600 brinell long life components
- Unique lip enhances bucket strength
- Lower cost re-useable retainers
- Highly productive reversible self-sharpening system
- Excellent penetration & increased productivity
- Holistic design- incorporates bucket wear protection
- Smooth internal & external bucket floor
- Unrivalled GET & lip life

CUSTOMER SUPPORT

Quality workmanship, commitment and expertise each time — every time.

Systems can be sophisticated and products outstanding, but ultimately their effectiveness relies on the expertise of the people behind them. When you invest in Komatsu, you are buying into a wealth of expertise, quality product, service and commitment.

With more than 1,500 employees, Komatsu Australia has the talent and expertise to provide you with the best solutions. No matter how big or small your requirements are, Komatsu offers total customer support. For more information call today and speak to a highly trained expert.
