## RENTAL SOLUTIONS

Accredited technicians, state of the art diagnostic equipment and advanced facilities ensure Komatsu Rental machines are fully serviced and maintained for the duration of your rental period.

In addition to the uptime benefits that come with professionally maintained equipment, Komatsu Rental solutions are designed to minimise your downtime and ensure long-term reliability of the machine you are operating.

Komatsu Rental's many packages ensure that you can choose one that suits your business requirements best. Whether you rent a single machine for a short period or multiple machines for 12 months, our rental options offer cost-effect solutions to help your business maximise long-term profitability.

Why rent with Komatsu:

- » No capital investment
- » Lower risk
- » Flexibility in fleet to meet project requirements
- » Choose from the latest earthmoving machines, equipped with industry-leading technology
- » Maintenance-free rental
- » Only national based Original Equipment Manufacturer (OEM) rental business

## EXCAVATORS

Komatsu's construction and utility excavator range features class leading power output, stability, lifting capacity and operator comfort.

Komatsu develops and produces all major components, such as engines, electronics and hydraulic components, in house. To achieve both high levels of productivity and economical performance, Komatsu has developed the main components with a total control system. The result is a new generation of high performance and environment-friendly excavators.

Model	Engine Power (kW@rpm)	Weight (kg)	Dig Depth (mm)	Bucket Breakout (kgf)

## MINI EXCAVATORS

The Komatsu mini excavators are smaller than their larger counterparts; however they are stacked with several features and benefits, these include:

- » Komatsu's Closed-centre load Sensing hydraulics for powerful performance,
- » Large operator stations with leading ergonomics for ease of operation and comfort,
- » Class leading accessibility for maintenance and servicing through tilting cabin platforms.

Model	Engine Power (kW@rpm)	Weight (kg)	Dig Depth (mm)	Bucket Breakout (kgf)
PC18MR-3	11.2@2600	1,780	2,160	1,620

PC88MR-10	48.8@1950	8,720	4,110	6,250

## WHEEL LOADERS

Komatsu Wheel loaders have proven themselves worldwide as multi-purpose loaders in earthmoving applications and in quarries.

Komatsu loaders offer an integrated design ensuring value and durability. Components are designed to work together delivering high production, greater reliability and more versatility.

The new rental solution offers you Komatsu wheel loaders to provide you with high productivity and low fuel consumption.

Model	Engine Power (kW@rpm)	Weight (kg)	Bucket Capacity (cum)	Bucket Breakout (kgf)
WA200PZ-6	94@2000	11,135	2	10,840

WA600-8	395@1800	56,280	6.4	39,500

## DUMP TRUCKS

With their powerful Komatsu engines, exceptional strength and state-of-the-art design, Komatsu dump trucks transport heavy loads quickly, easily and cost effectively. Komatsu dump trucks are available in rigid and articulated version. They guarantee complete driving safety, even at high speeds.

From the transmission system and chassis to the axles and suspension, all the components are designed to handle demanding daily stresses for maximum reliability and productivity.

Dump Trucks - ADT				
Model	Engine Power (kW@rpm)	Weight (kg)	Payload Capacity (kg)	Travel Speed (kmph)
HM300-5	242@2000	25,395	28,000	58.6
HM400-5	348@2000	35,055	40,000	55.9

Dump Trucks - Rigid				
Model	Engine Power (kW@rpm)	Weight (kg)	Payload Capacity (kg)	Travel Speed (kmph)
HD405-8	383@2000	37,335	40,000	66
HD605-7E0	533@2000	46,200	63,000	70

## GRADERS

Komatsu graders feature the best cab visibility of any grader on the market, increased engine power, and all components are designed and manufactured by Komatsu, to ensure that everything works together in the best possible way.

Model	Engine Power (kW@rpm)	Weight (kg)	Blade Width (mm)	Length (mm)
GD555-5	120@2000	18,120	3,710	10,363
GD655-5	134@2000	18,520	4,320	10,575

## BACKHOE LOADERS

The Komatsu backhoes feature rigid two and four wheel steering, with a long tradition of quality and well established experience in the world wide industry of backhoes – Komatsu has set a new benchmark for the market with complete optimisation of the operators work environment, state of the art technical solutions and a wide choice of optional equipment and configuration.

Model	Engine Power (kW@rpm)	Weight (kg)	Dig Depth (mm)	Bucket Capacity (m³)
WB97R-5	74@2200	8,450	6,465	1.03
WB97S-5	74@2200	9,510	6,465	1.1

## DOZERS

Komatsu Dozers combine a comfortable operator environment with the latest bulldozer technology – giving excellent performance over the whole working cycle of the machine. The high-quality components and a unique undercarriage design make Komatsu dozers the most cost efficient and productive machine in the market.

Model	Engine Power (kW@rpm)	Weight (kg)	Blade Capacity (m3)	Length (mm)
D61EXi-23	125@2200	17,890	3.4	5480

## TECHNOLOGICAL *INNOVATION*

### *KOMTRAX*

Komatsu's KOMTRAX machine monitoring system tracks your equipment in the field and maximises output through increased efficiencies and timely maintenance.

The KOMTRAX system will provide you the following benefits:

- » **Fleet management** – improved fleet utilisation
- » **Machine locations** – know exactly where your machine is
- » **Work monitoring** – know exactly what your machine is doing
- » **Security** – lock your machines remotes and get notified if the machine moves for a certain distance
- » **Instant email notifications** – can be enabled to provide you with real-time data on your machine

### *iMC*

Komatsu's innovation **intelligent Machine Control** technology solutions will help you become productive today and into the future. iMC is designed to let operators focus on moving material efficiently, from bulk excavation to final time, without having to worry about over-excavation or damaging the surface resulting in improvement in efficiency and productivity.

- » Komatsu offers a range of "intelligent" machine control dozers and excavators.
- » The intelligent dozer features the world's first fully automatic blade control system, allowing them to carry out both bulk and final trim dozing from start to finish – with final grade performance.
- » The intelligent excavator range has brought true machine control and automation to excavators for the first time, bringing significant advances in ease of operation and precision.

iMC technology allows our machines to increase efficiency across all operator skill levels, whilst reducing the cost of each meter of material moved.

### *SMARTCONSTRUCTION*

SMARTCONSTRUCTION integrates a host of game-changing technologies, enabling Komatsu to provide end to end solutions for customer across construction, quarrying and mining.

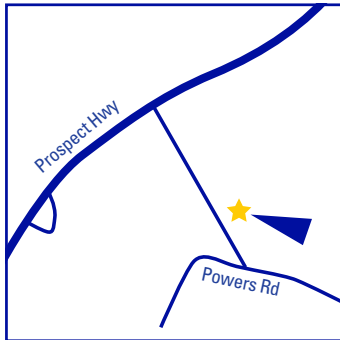

SMARTCONSTRUCTION covers four main areas:

- » A UAV (unmanned aerial vehicle) drone service, covering initial site survey, along with cut/fill and stockpile calculations, as well as ongoing progress tracking and site logistics.
- » 3D data services, including conversion of 2D and 3D data files to formats suitable for machine control applications, and a best-industry practice 3D design consultancy, development and management over the life of a project.
- » Our cloud-based service, bringing together all the information relating to a project, from initial survey, design drawings and construction plans, through to machine control data files, project progress data generated by machines and survey equipment as the job progresses, and final as-built information once it is completed.
- » Support services, covering remote monitoring, remote file transfer and operating training; iMC (intelligent Machine Control) advice, project integration and site set up; assistance and professional consultancy with 3D design file development; troubleshooting and servicing of machines and control systems.
