KOMATSU VR SIMULATORS FOR HIRE

KOMATSU

Driven by your success

REVOLUTIONISING OPERATOR TRAINING WITH *ADVANCED TECHNOLOGY.*

The Komatsu Virtual Reality (VR) Simulator is our new technology combining online training with realistic machine controls.

It is designed to deliver effective and efficient hands-on training for operators to develop, practice and assess their skills in an engaging simulated work environment.

Delivered by Komatsu Training Academy, the Komatsu VR Simulator is now available for hire and tailored to suit your business needs. Whether you need it daily, weekly or monthly, our simulators come with an option to include a Komatsu trainer to help assist with setup and demonstrations at your next company conference or staff training day.

Features:

» The simulators are mobile and easy to setup, including a fully programmed training module with real-time feedback and scoring. Training modules include:

- Joystick Control
- Basic Traveling
- Digging a Shallow Trench
- Loading a Truck from a Bench
- Building a Ramp
- Digging and Dumping
- Skills Builder (practice environment)

» 3D virtual environment gives an unparalleled level of visibility and retention.

» Real machine controls giving operators experience of the true look and feel.

WHAT'S INCLUDED IN THE VR KIT?

KOMATSU

Driven by your success

Two Transport Cases

Virtual Reality
Display and Hardware

Physical Excavator
Joystick & Pedals Controls

High End PC, Monitor, Keyboard,
Mouse & Headphones

BENEFITS

1. Reduce wear and tear

Operators will be able to seamlessly apply their skills to a real work environment, operate real machines with greater precision and efficiency thus reduce wear and tear and potential machine downtime.

2. Maximise safety in the workplace

Online training modules with realistic machine controls helps operators increase their ability to handle high adrenaline situations confidently and safely.

3. Assess operator skills with real-time scoring

Operators can accurately measure their skill level across a range of different tasks. Training is assessed with real-time feedback and scoring. After scoring a pass mark, operators will receive a Certificate of Completion, or undertake the assessment to obtain a nationally recognised statement of attainment.

4. Tailored to your business needs

Komatsu VR Simulators can be hired to suit your requirements daily, weekly, or monthly. In addition, our technical operator trainers are also available to help assist you and your employees with improving their operator efficiency with training modules, setup and demonstrations.

5. Anywhere, anytime

Komatsu VR Simulators are available anywhere in New Zealand and Australia and can be delivered to a customers' site, or at our purpose-built training facility in Sherwood, Queensland, or in the Komatsu Mobile Training Centre.

HOW WE CAN DELIVER VR SIMULATOR TRAINING?

KOMATSU

Driven by your success

The Komatsu VR Simulator can be delivered on a customer site, in training rooms or at company conferences.

Training can also be delivered at at our purpose-built training facility in Sherwood, Queensland, or in the Komatsu Mobile training Centre.

Our Training HQ: Komatsu Technical Education Centre (KTEC)

KTEC has become Komatsu Australia's primary training centre for operators and technicians in Australia, New Zealand and New Caledonia. It is one of the region's most advanced technical training facilities for mining, earthmoving and utility equipment. Located on more than 3 hectares of land, it has more than 2600 sq. m of dedicated training facilities including 7 classrooms, 5 technical/electrical laboratories and a large machine operator's workshop. KTEC also incorporates a number of simulators, giving both novice and experienced operators the ability to safely learn on a range of machines.

Komatsu Mobile Training Centre

Komatsu Training Academy also offers a mobile training centre. Equipped with air-conditioning and its own kitchenette, the mobile centre can accommodate 12 trainees and provides underground, above ground and face-to-face training with or without simulators, supervised by our specialised trainers.
